

Dear EU internal trade information provider

STATISTICAL DECLARATIONS ON INTERNAL TRADE IN 2012

Your company's obligation to provide statistical information on EU internal trade remains unchanged until further notice. Your obligation to provide information will be confirmed after the data on statistics and value-added tax for all of 2011 is completed, and you will be separately informed of any changes. In 2012, **the threshold value of the obligation to provide information** is EUR 275 000 for arrivals and EUR 500 000 for dispatches.

There will be many changes to the **CN nomenclature** at the beginning of 2012. Enclosed you will find a list of the changes. Please pay particular attention to the determination of commodity codes, as the wording of many of the commodity codes has also been changed. The Combined Nomenclature and its texts are available on the Finnish Customs website (www.tulli.fi/en > Finnish Customs > Foreign trade statistics > Nomenclatures and classifications).

From the declarations for January 2012 onward, **goods delivered to vessels and aircraft** (so-called victualling supplies) will no longer be declared using the Intrastat declaration. The statistical data will be retrieved through a separate procedure.

The due dates for submitting statistical declarations are also defined as before. The statistical declaration shall be submitted by the 10th working day of the month following the statistical reference month. The due dates are listed on page 15 in the Guide, under point 12. Statistical period and date of submission.

With kind regards,

Statistics Director Timo Koskimäki

Senior Customs Officer Terttu Tähtivaara
